SureView Systems Announces Integration with Innotech Security

Integrated platform enables users to combine video surveillance, central station monitoring

Tampa, Fla. (April 28, 2015) — SureView Systems, a global provider of commercial central station and enterprise command center software, announced today integration with the Pro-Lite and Enterprise series digital video recorders (DVRs) from Innotech Security for the SureView Immix® Central Station and Command Center software.

Innotech Security and SureView have formed a fully functional video and audio integration for interactive monitoring services, including live video, pan-tilt-zoom camera control, post-alarm recording, audio capabilities and relay control. This integration strengthens both SureView's and Innotech's ability to deliver comprehensive, best-in-class security and business services to their customers.

"Our integration with the SureView Immix platform provides our customers with the ability to deliver a comprehensive central station solution for alarm and video monitoring, as well as response to incidents in a timely manner," said Devin Benjamin, CEO, Innotech Security. "Innotech's customers rely on us to provide a tailored solution to meet their security requirements, and partnering with SureView further extends our technology capabilities."

The SureView Immix platform is a Web-based, networked software platform solution designed for enterprise businesses and central stations to protect critical assets. Its flexible architecture and large integration library also supports a rapid deployment model and strong return on investment.

"We have continued our dedication to offering one of the largest integration libraries in the security industry, and working with Innotech helps us strengthen that link even more," said Chris Brown, Director of Central Stations, SureView Systems. "Working with Innotech's Pro-Lite and Enterprise series technology helps us demonstrate our dedication to providing comprehensive security monitoring solutions to our partners."

About Innotech Security

Innotech Security has designed several unique technologies, some of which include the company's patent pending SMARTCONTROL CAT5 Solution and Intelli-FLEX line. These technologies have brought Innotech Security to the forefront in CCTV engineering and design. Innotech Security is constantly researching and designing new features and technologies, which enhance their products and the way they are used. Innotech also prides itself in its ability to work with clients that need custom design and equipment for specific applications. For more information, visit www.innotechsecurity.com.

About SureView Systems

SureView Systems is an industry-leading provider of command-and-control software for enterprise and central station environments. Its flagship solution, SureView Immix® is a comprehensive cloud-based software platform designed to integrate with multiple sensors, systems and devices to provide organizations with a comprehensive view of security profiles, risk management and business operations from a single, intuitive user interface. Immix is deployed successfully in a wide variety of environments including the central station, transportation, education and enterprise markets. SureView supports the largest integration library in the industry, enabling ease of deployment and system administration for a wide variety of organizations across the globe.
